Rochester Institute of Technology, Rochester, NY

B.S. Humanities, Computing, and Design, Minor in Marketing, May 2024

Alpha Xi Delta — Historian and Leadership Role supporting event coordination, documentation, and member engagement

EXPERIENCE

Whole Foods Market, Rochester, NY — Specialty Team Member (Cross-Trained) | Jul 2025 – Present

- Cross-trained across departments to understand store operations, inventory flow, and product placement while guiding customer decisions by identifying needs, preferences, and use cases and communicating options in a clear and structured way
- Regularly adapt communication based on how individuals respond to information and adjust recommendations accordingly

PLAY Lab, NTID at RIT, Rochester, NY — Research Assistant | Jan 2025 – May 2025

- Supported research studies by facilitating participant sessions, documenting interactions, and recording qualitative data under the direction of lead researchers
- Conducted structured interviews and testing sessions in ASL and English while maintaining consistency with study protocols and preparing materials for sessions

Venture Creations Incubator, Rochester, NY — Communications and Design Intern | May 2021 – Aug 2023

- Supported 15+ startups by creating marketing materials, web content, and communication assets tailored to different audiences and product needs
- Translated complex or technical ideas into messaging that was easier to understand and engage with
- Managed multiple projects with shifting priorities and timelines

New Normal Life (CVS partnerships) — Remote — Freelance Designer | Jan 2023 – Present

- Designed packaging and visual materials for wellness kits distributed across college campuses, focusing on layout, readability, and clear communication of information
- Created production-ready designs used in large-scale distribution while aligning with brand and sponsor requirements

PROJECT

Grad Job Search Engine Prototype — Developer/Researcher | Sep 2023 – May 2024

- Investigated inconsistencies in entry-level job listings by labeling 1,000 postings and analyzing a dataset of 500,000 listings
- Developed filtering logic and explored natural language processing methods (BERT) to improve classification accuracy
- Evaluated results through user feedback to assess the clarity and usefulness of search outputs

SKILLS

Research documentation, Interviewing and testing, Usability principles, Information organization, Product and marketing communication, Figma, Adobe Creative Suite, HTML, CSS, JavaScript, Data analysis
